WHEELED & TRACKED MINI SKIDSTEERS

Manufactured by Baualight in Wallenstein, Ontario, our line of rugged Mini Skidsteers are designed for versatility. At Baualight, versatility not only means offering a carrier that can easily navigate in tight spaces, but it also means providing a wide selection of useful tools and attachments.

Powered by either a Honda, Kubota or Yanmar engine, the Baualight Mini Skidsteers have a hydrostatic drive controlled by true joystick controls. Our Mini Skidsteers come standard with an interchangeable universal mini skidsteer quick attach plate. Baualight uses a three-pump hydraulic operating system, one for hydraulic flow to run the machine's auxiliary & boom and two pumps for the propulsion systems, one for each drive side. There is a dedicated oil cooler to better manage hydraulic heat generation and the lift cylinders are cushioned at the end of stroke.

WRL58G FEATURES

Honda Gas Engine

The WRL58G model is powered by a reliable 22.1 HP (688cc) Honda GX690 gas engine.

Operating Capacity

The WRL58G model has an operating capacity of 665 lbs (35% of tip capacity) and 760 lbs (35% of tip capacity) with added weight kit.

Ground Speed

The ground speed of the BaumaLight Mini Skidsteers is quite impressive with the wheeled model able to reach 7.84 km/h.

High Capacity Fuel Tank

The high capacity fuel tank holds 12.5L of fuel allowing you to work longer.

Ground Clearance

The WRL58G has a ground clearance of 8 inches.

Stand-In Operator Compartment

For a safer and more comfortable operation, the operator compartment allows you to fully stand inside.

TRL620Y SPECIFICATIONS

Yanmar 3TNV80F Diesel Engine	11 GPM Under No Load
5.7 km/h Travel Speed	Joystick Boom Control
Single speed motor	Standard Self-Leveling
22.8 HP	76" Pin Height
Engine Displacement 1.267 L	40L Fuel Tank with Gauge
Joystick Drive Control	6.5" Ground Clearance

For a full list of specifications visit www.baumalight.com

TRL536D, TRL620D & TRL620Y, TRL630D, TRL630Y FEATURES

Floating Ride-on Platform

The floating ride-on platform provides the operator a smooth ride and improved visibility.

Hydraulic Float

The operator can gently skim the attachment along the contour of the surface without down pressure or lift.

Self-Leveling

Make sure your load remains level to the ground while you're raising the boom.

Standard Case Drain

Sometimes referred to as a third line, the case drain line will relieve any excess pressure and drain it back to your return line, then into the reservoir.

Far Reach

When you need to reach a far distance, the Baumalight Tracked model is designed for maximum reach. This design feature allows you to load and unload trailers or dump your load from further away.

4-Pin Two Switch Electric Aux Option

As an added option we can offer a boom mounted electric AUX option for the TRL620D/TRL620Y tracked unit, this can be ordered at the factory or field installed

Diesel Engines

The TRL620D model is powered by a 24.5 HP Kubota D1105 diesel engine. The TRL620Y is powered by a 22.8 HP Yanmar 3TNV80F diesel engine. The increased displacement (1.267 L) of the Yanmar engine equates to a higher torque.

TRL536D, TRL630D & TRL630Y FEATURES

2 SPEED

POWER

8.8 KM/H MAX SPEED

FORCEFULL BULLDOZING

AUTO ANTI-STALL

2-SPEED MOTOR

Max Speed 8.8 km/h

When the job requires less torque and more speed, the 2-speed motor can easily shift from low speed to high speed, reaching a maximum travel speed of 8.8 km/h.

Bulldozing Power

With a 2-speed motor, the low speed engages the high torque, resulting in an impressive amount of bulldozing power.
